Customer Reviews

Containing worked-out solutions for all problems in the text.

Provides answers to ALL of the end-of-chapter questions. Very detailed and hardly any typos. In fact there are more typos in the actual textbook than in the solutions manual, and the solutions manual even acknowledges the mistakes in the textbook from time to time. If you are looking to do end-of-chapter questions from the textbook, this book is an absolute must, especially considering that a good number of the topics addressed in the end-of-chapter questions are not even discussed in the textbook. I'd be lost without this book.

Solutions to every discussion question, exercise, and project problem is in this manual. That's the most important thing. The solutions themselves are reasonably thorough; they offer exactly what you need to solve the problem. In addition, I really like the way the book looks page by page; for some reason the way the solutions are presented, the font size, and even the type of paper in the manual makes it a refreshing read for me.

Awesome book:)

Life saver. That is all that needs to be said. Must have if you are taking this class.

Purchased it for my daughter to study for the MCAT test. She is getting lots of use of it and likes the manual.

good product for the money

Very good book

This solution manual book is the best book. All the questions have solved in clear and understandable way. It helps me to understand the subject matter. Wonderful book.
