Book as advertised. No issues. Good buy.

Book has minimal writing for being in very good shape overall all pages are there and book is in tact.

I like this book because I really get to understand and to learn more of pesticides and to have a better future this book was all I needed to learn a lot

This is the book needed to prepare for the CA Department of Pesticide Regulation's QAL/QAC exams. However, it is available new from the University of California's ANR Catalog for \$35! I cannot believe what people are trying to sell this book for on . Always check for books like this (including UC's IPM Handbook and UWYO's *Weeds of the West*) from the school or organization that publishes them. They will almost always be cheaper.
