Customer Reviews

"I really like the setup of this book. The key terms, lab activities, numerous tables in each chapter, medical links, career profiles, medical highlights, medical terminology linked with each system, and effect of aging all bring each chapter together perfectly and makes this book a great asset to the medical students just beginning their careers." --This text refers to the Paperback edition.

Ann Senisi Scott was previously the Coordinator of Leadership Programs at Mount Mercy College, Cedar Rapids, Iowa. She also served as Coordinator of Health Occupations and Practical Nursing

at Nassau Tech Board of Cooperative Education Services, Westbury, New York, where she was responsible for several health career programs offered at Nassau Boces, including Practical Nursing, Nurse Assistance, Medical Assistant, Medical Lab Technician, Dental Assistant, and Dental Lab. In addition, she worked to establish a career ladder program from health care worker to practical nurse. Before becoming the administrator of these programs, she taught Practical Nursing for more than twelve years.

The book goes into detailed information in every each chapter and has good review questions at the end of the chapter. I really enjoyed using this book for my anatomy class and will recommend it to my classmates.
