Multicultural Psychology: Understanding Our Diverse Communities

Synopsis

Multicultural Psychology: Understanding our Diverse Communities, Fourth Edition, combines quantitative and qualitative research with anecdotal material to examine multicultural issues and capture the richness of diverse cultures. The text is organized by topics in multicultural psychology rather than by ethnic groups, smoothly integrating important findings across ethnic groups as relevant. The text uses first-person narrative accounts from people of all ages and cultures in order to illustrate compelling topics such as communication, racial and cultural identity, development, racism, differences in worldviews, and immigration. Other issues covered in the text include gender, sexuality, age, and ability.

Customer Reviews

"The personal stories and discussion of current events make the text relatable to students' life experiences and help them to connect with the material." --Danice L. Brown, Southern Illinois University
"This is an up-to-date book on multicultural psychology that does an excellent job of bringing sensitive, difficult, complex, and unsettling concepts to life through the use of first-person narratives." --E. J. R. David, University of Alaska Anchorage
"This is the go to text for multicultural psychology for undergrads." --Rocio Rosales Meza, University of La Verne
"This compact and highly readable text presents a broad foundation of understanding the issues psychologists address when studying culture, and the practical applications of theory in society today. Students are encouraged to delve into exploration of their own backgrounds, attitudes, and behaviors in regard to cultural differences." --Mary Mallory Rogers, Shasta College

Jeffery S. Mio is Professor in the Psychology and Sociology Department at California State Polytechnic University Pomona. Lori A. Barker is Professor in the Psychology and Sociology Department at California State Polytechnic University Pomona. Melanie M. Domenech Rodríguez is Professor of Psychology at Utah State University.

Great material covered in this book. Very well thought out. I bought this book for a Multicultural Psychology course. While I am still cringing about the price I paid for it, this is one of my favorite academic texts I have purchased and read in my academics. The authors of this text try their best and in my opinion succeed in covering this sensitive and meaningful subject. Thank you!

This was helpful and insightful to our homework assignments

This textbook is a very readable format, physically and mentally. I love that it's small and can fit into a purse, and the pages are thin so it's not bulky. The concepts are broken down and accompanied by short personal accounts, kinda like a Humans of New York post. Just what I needed for my class.

This book was needed for my class, and it is an easy read, easy to follow and pretty informative about the subject.

The textbook is good and the material is explained well. However, my NEW copy of the textbook is missing pages 109-140 and considering I bought this text for a college course, it makes it quite difficult to write a reflection paper on something I cannot read. That disappoints me for sure!

Needed for a class

Great Condition and very easy to use in class

THIS BOOK ACCOMMODATED MY NEED
