Grade Level: 3 and up

Customer Reviews

Math in Focus The Singapore Approach 3A level is a first semester third grade curriculum. It is advanced so it could be used after first semester third grade. This is a Saxon curriculum for strong math students.

Being a special educator, I bought the book to teach my students the Singapore Math Method. Data shows that Singapore is a leader in math education and testing. I highly recommend for every teacher. I also recommend the student text book, the workbook and the assessment book. Outstanding pictorial method of teaching math to visual learners. Unlike some text books the scope and sequence is superb. I recommend all books in this series for a good math foundation and increase math scores. Dr. Charles Watson Smith Jr.

Singapore math is all the rage at the present moment. The efficacy of this method is still to be evidenced. No current research available. Another method to teach children basic math.

lots of learning going on at my house because of this book, its great with tons of pics and examples

Thanks

Great! Arrived 4 days before the estimated date.

Love these. My daughters school use them so I got this series. Good explanation of concept.

My children use this in school and they were doing fine in math until this program was introduced. Now both my 5th and 3rd grader are struggling. My 3rd grader usa having such a hard time she gets physically ill before every test. It teaches concepts and then doesn't review them so kids have a full knowledge. Saxon math is a much better math approach as it teaches repetition and a clearer learning for kids.
