Customer Reviews

wow! amazing book! Answered so many questions that I had about Medicare. The process of applying for medicare is confusing to some people and this was a very good guide that explained everything in detail. This book saved me a ton of time (spent on browsing websites, calls). I am glad that I bought this book and would recommend this book to anyone.

There wasn't enough detail on the different Parts and how they are related to other Medicare programs and initiatives (shared savings programs, managed care).

Great primer for Medicare newbies - gives just enough information without being overwhelming. Answered many of my questions about the different parts to Medicare (working was so much easier

than being retired as far as medical insurance is concerned) - However, overall, I felt it is a good book to begin your research.

Thank you a lot ! I've been looking for Medicare explanation for months. This book is most complete i've purchased all over the web. It gave me a lot of useful informations, the history, the principles of Medicare. I wish I have found this book month ago. If you're looking for Medicare information, this is the book you need.

Nice basic overview for Medicare and its various features. Far from comprehensive, but a good foundation of basics to help you begin to navigate the wacky, wonderful world of Medicare.

I purchased this for my husband, to help him understand Medicare, he will be 65 this year and totally knew nothing about A, B, C, or D. It is proving to being very helpful

Great product and fast delivery oh did I say the price was pretty good as well :)

Just skimmed it so far but it has good content. I may adjust rating after I read it.
