Spectrum Geometry, Grades 6-8

Synopsis

Spectrum Geometry helps students apply essential math skills to everyday life! The lessons, perfect for students in grades 6-8, strengthen math skills by focusing on points, lines, rays, angles, triangles, polygons, circles, perimeter, area, and more! The variety of activities also help extend problem-solving and analytical abilities. It features easy-to-understand directions, is aligned to national and state standards, and also includes a complete answer key. Today, more than ever, students need to be equipped with the essential skills they need for school achievement and for success on proficiency tests. The Spectrum series has been designed to prepare students with these skills and to enhance student achievement. Developed by experts in the field of education, each title in the Spectrum workbook series offers grade-appropriate instruction and reinforcement in an effective sequence for learning success. Perfect for use at home or in school, and a favorite of parents, homeschoolers, and teachers worldwide, Spectrum is the learning partner students need for complete achievement.

Average Customer Review: 4.6 out of 5 stars 29 customer reviews

Best Sellers Rank: #130,890 in Books (See Top 100 in Books) #28 in [Books > Teens > Education & Reference > Mathematics > Geometry](#)

Customer Reviews

I am a teacher and I also tutor so I am always looking for good workbooks to use with my students. This book met my needs to teach Geometry. I like that it has a pre-test and a post-test for each unit, so you don't have to go through the whole book if your student passes the pre-test. It has an answer key and it is also very kid friendly. I would recommend the Spectrum series.

Purchased this workbook to help improve our son's math score who is in the 7th grade. After

consecutive report cards with a "c" in math and a progress report pointing to yet another C, I decided to have my son do a few extra problems a day (about 6 EVERY day including weekends). Well, I'm glad to say the last report card was all A's and B's including a B in math. This book has a good variety of problems, but what I like best is the perforated answer sheets in the back! I easily detached and keep them to quickly check my sons work, and let him know which problems need to be re-worked, If you've been out of school a loooooong time like myself, it helps tremendously to be able to quickly determine if your child has solved the problems correctly. Also purchased the Algebra workbook for grades 6-8. Very happy with this purchase and price is definitely worth the results!

We used this as a workbook in the summer to review/reinforce math done during the school year. If you are not, as a parent, good in math, be aware that this workbook does not teach concepts and give examples. It just has problems and answers in the back. Since math is my strength, I did not find it problematic.

I use all of the Spectrum materials as support material for my grandson's school work, and have found them to be the best I have used for that purpose, money well spent. These books come with tear-out sheets that can easily be scanned for doing work on the computer.

good enough content, as is all their books. My daughter just wasn't ready for it.

I bought this workbook to help my son understand geometry (actually to help him get a head start in school for next year. Great workbook.

This is perfect for me and homeschooling my kids, no guess work because this is keeping us right on grade level.

Extra work beside school. If you need it.
