I love these. Bought these to help third grader. Comes with so many flash cards and has various amounts of difficulty levels! It includes both front and back problems and helps understand logic of the cards. The box keeps them well and has flash cards to make to help student understand more math! Great purchase!

Wonderful flash cards, but I recommend laminating them if you want use them often. Maybe newer sets could be printed on different/ heavier papers or cardstock.

It's very hard for me to teach the Chinese Multiplication tables for kids by itself, but this math flashcard has the same order as Chinese Multiplication tables. So, the kids have interests to recite and apply it together. Wonderful!

We got this for my son's advanced placement testing to use while in line at Disney Land for Thanksgiving and it was a terrific way to drill him on math basics quickly and with minimal fuss.

Great tool to practice math skills

Exactly what they said and I like they tracking system on the side. It helps keep my son motivated.

Wish they were on heavier paper or laminated.

These seem to be helping my 8 year old
