Customer Reviews

"[Most guidebooks are by] backpackers who occasionally day hike. But most people are day-hikers, who occasionally backpack. And that's the key difference to this series." -Ron C. Judd
"The series...earns points for rating each individual trip on a five-scale and for providing a comparative overview of all hikes in each book's introductory pages. For those of us who like to cherry-pick trails, ratings simplify our task." - Seattle Times
"The presentation of basic facts (distance, elevation gain, maps, permits, etc.) is excellent and easy to follow. In addition to helpful topographical maps, the guides feature elevation profiles - an inspired addition!" -The Olympian

I think the trail descriptions will be very helpful in choosing where to hike. I do like the way the book is laid out. I checked it out of my local library prior to purchase to see if I would like it. Also the "look inside" feature was very helpful.

In planning for hikes this upcoming summer trying to use this book , 2nd edition, I have found the map references to be totally inaccurate.

Can't wait to try these hikes.
