# Laboratory Exercises In Environmental Geology

## Synopsis

This laboratory manual has been fine-tuned to fulfill the needs of an introductory course for majors and non-majors. Reduced math and chemistry coverage and condensed lab exercises make the manual more manageable for your one-semester course, while offering a range of problems to match each student's abilities. Lab exercises focus on a broad range of environmental issues and include full-color photography to make identification problems easier. Author Harvey Blatt also covers the social issues relevant to environmental concerns and the effects of human intervention in geological processes.

## Customer Reviews

Harvey Blatt is the author of "America's Environmental Report Card: Are We Making the Grade?" (MIT Press). He taught geology at the University of Houston and the University of Oklahoma for many years and is now Professor of Geology at the Institute of Earth Sciences at Hebrew University of Jerusalem.

This textbook arrived promptly and was brand new! I got it for a great price and I am very satisfied with my purchase.
