Modern Systems Analysis And Design (8th Edition)

Synopsis

For Structured Systems Analysis and Design courses. **Help Readers Become Effective Systems Analysts** Using a professionally-oriented approach, **Modern Systems Analysis and Design** covers the concepts, skills, and techniques essential for systems analysts to successfully develop information systems. The Eighth Edition examines the role, responsibilities, and mindset of systems analysts and project managers. It also looks at the methods and principles of systems development, including the systems development life cycle (SDLC) tool as a strong conceptual and systematic framework. Valuing the practical over the technical, the authors have developed a text that prepares readers to become effective systems analysts in the field.

Book Information

Hardcover: 544 pages

Publisher: Pearson; 8 edition (January 17, 2016)

Language: English

ISBN-10: 0134204921

ISBN-13: 978-0134204925

Product Dimensions: 8.7 x 0.9 x 10.8 inches

Shipping Weight: 2.6 pounds (View shipping rates and policies)

Average Customer Review: 3.6 out of 5 stars 4 customer reviews

Best Sellers Rank: #10,358 in Books (See Top 100 in Books) #7 in [Books > Textbooks >](#)

Customer Reviews

Joseph S. Valacich is an Eller Professor of Management Information Systems in the Eller College of Management at the University of Arizona. He has had visiting faculty appointments at Buskerud College (Norway), City University of Hong Kong, Norwegian University of Life Sciences, Riga Technical University (Latvia), and Helsinki School of Economics and Business. He received a PhD degree from the University of Arizona (MIS), and MBA and BS (computer science) degrees from the University of Montana. His teaching interests include systems analysis and design, collaborative computing, project management, and management of information systems. Professor Valacich co-chaired the national task forces to design IS 2010: The Model Curriculum and Guidelines for Undergraduate Degree Programs in Information Systems. He also served on the Executive

Committee, funded by the National Science Foundation, to define the IS Program Accreditation Standards and on the Board of Directors for CSAB (formally, the Computing Sciences Accreditation Board), representing the Association for Information Systems (AIS). He was the general conference co-chair for the 2003 International Conference on Information Systems (ICIS), and the co-chair for the Americas Conference on Information Systems (AMCIS) in 2012. Prior to his academic career, Dr. Valacich worked in the information systems field as a programmer, systems analyst, and technical product manager. He has conducted numerous corporate training and executive development programs for organizations, including AT&T, Boeing, Dow Chemical, EDS, Exxon, FedEx, General Motors, Microsoft, and Xerox. Dr. Valacich is the co-Editor-in-Chief for AIS Transactions on Human-Computer Interaction, a senior editor at MIS Quarterly, and was formerly an associate editor for Information Systems Research. He has published more than 200 scholarly articles in numerous prestigious journals and conferences. His scholarly work has had a tremendous impact not only on the field of information systems, but also on a number of other disciplines, including computer science, cognitive and social psychology, marketing, and management. In February 2014, Google Scholar lists his citation counts at over 13,800, with an H-index of 54. He is also a coauthor of the leading Modern Systems Analysis and Design (Seventh Edition) and Information Systems Today (Seventh Edition). Joey F. George is professor of information systems and the John D. DeVries Endowed Chair in Business at the Iowa State University College of Business. Dr. George earned his bachelor's degree at Stanford University in 1979 and his PhD in management at the University of California at Irvine in 1986. He was previously the Edward G. Schlieder Chair of Information Systems in the E. J. Ourso College of Business Administration at Louisiana State University. He also served at Florida State University as Chair of the Department of Information and Management Sciences from 1995 to 1998. Dr. George has published dozens of articles in such journals as Information Systems Research, Communications of the ACM, MIS Quarterly, Journal of MIS, and Communication Research. His research interests focus on the use of information systems in the workplace, including computer-based monitoring, computer-mediated deceptive communication, and group support systems. Dr. George is coauthor of the textbooks Modern Systems Analysis and Design, Seventh Edition, published in 2014, and Object-Oriented Systems Analysis and Design, Second Edition, published in 2007, both from Pearson. He has served as an associate editor and senior editor for both MIS Quarterly and Information Systems Research. He served three years as the editor-in-chief of the Communications of the AIS. Dr. George was the conference co-chair for the 2001 ICIS, held in New Orleans, Louisiana; conference chair for the 2012 ICIS, held in Orlando,

Florida; and the doctoral consortium co-chair for the 2003 ICIS, held in Seattle, Washington. He is a Fellow of the Association for Information Systems (AIS) and served as President of AIS from 2010 to 2011.

buyer beware.. there are two physical versions of this book, the hardback and paperback, and the content is not the same. i purchased the paperback version to save a few bucks, but it turns out the paperback is the "global edition" and the problem questions at the end of the chapters are not the same. not sure would list these on the same page if they're not the same book..

Great book. Up to date with a wealth of information on systems analysis and design. Great for college and as a reference for your job in IT related fields.

Arrived on time and as described.

Makes sense to me...NOT
