Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

I am so impressed with this little pamphlet. I have plenty of books that try to explain to me how to ID trees based on leaf patterns and shapes, they are so confusing with all their scientific terminology

that I just get lost. This guide shows the color and shape of the fruit/seeds, flowers and leaves, along with a profile of the tree in winter and a short description of the plant. It is extremely helpful in identifying the trees on my property. It helped considerably in identifying what types of oak trees I have--as some have green or brown acorns, and some lose their leaves in the winter and others hold onto them until spring. I will be purchasing more pocket guides by this company.

Great little info pamphlet for spring time. Would be nice to have better pictures of the bark for non spring time. Great product though.

I love this pamphlet. It's concise and complete.

very helpful

Great Pocket field guide. Small but heavy Lamination packed with info & pictures. I bought all 3 for my 2 young sons age 7 & 4

very informative

this was for my grandson he loved it

This book is wonderful. It is exactly what we were looking for. We use it on the farm all the time to identify different trees and bushes. The pictures are detailed and verbiage is easy to understand. A must book for anyone in Arkansas and love the foliage. I would recommend it to all.
