The Old World And America

Synopsis

The story of America begins in the Old World, for the first American settlers came from Europe, bringing their heritage with them to the New World. The Old World and America, a popular and beloved middle-school history text, documents the Western World from the beginning of mankind through ancient timesâemphasizing Greek and Roman civilizationâChristâs coming and the founding of the Church, the Middle Ages, and the Renaissance, to the discovery of the New World and its exploration. Not only does this textbook recount the events which led history from the beginning to the discovery of the New World, but it also details the various civilizations upon which our Western world is builtâprimarily, the culture of the Catholic Church and its vital influence on both the Old World and the New. Includes study questions, tests, and topics for discussion.Â (394 pgs., PB.)

Customer Reviews

The Most Rev. Philip Joseph Furlong was born in 1892 at New York City. He attended Cathedral College and St. Joseph's Seminary prior to receiving Holy Orders on the eighteenth of May, 1918. He later received his doctorate in philosophy from Fordham University, and went on to become Professor of History at Cathedral College. Father Furlong served as an auxiliary bishop from 1956-1971, and published his textbook The Old World and America in 1937 through William H.

Sadlier Inc., New York. He retired from the Vicariate at the age of seventy-one and died on the thirteenth of April, 1989.

Concise, informative and interesting. The tests after each chapter are an added bonus. I find it a good source for 2nd and 4th grade history.

excellent

learned a lot

My daughter is currently using this text. I like it's concise, yet very informative, accurate, and precise content. It is her main history text for this year offering her a wealth of history from the beginning of Creation to the America's. We supplement from time to time with the Famous Men of the Middle Ages from Memoria Press. She's already had FM of Rome last year and of course the D'Aulaires book of Greek Myths with study guides (again from MP) was where she began her journey. We will go more in depth as time goes on through the years, but because of this book, most of the subjects, occurrences, and/or ideas will not be a stranger to her.

As the author's name and title suggests, this history text book is written by a Catholic priest and it is therefore a Catholic perspective of history that is presented. We are told that "'The Old World and America' tells the story of the Western World from the beginning of mankind - through ancient times, Greek and Roman civilizations, the coming of Christ and founding of the Catholic Church, the Middle Ages, the Renaissance, and the discovery and exploration of America, the 'New World'". The course is aimed at grades 5 - 8, and it should take the average child about 3 years to obtain a good understanding of the material presented. The great advantage of this text book is the clarity with which the information is presented. Each period of history under consideration receives an interesting yet brief (but never skimpy) treatment. The child's interest is stimulated so that the text book can be used as a launching pad for further reading about the particular period of history being studied. My family does not live in America but, with few adaptations, the book is just as relevant to our own country. A universally excellent textbook ideally suited for homeschooling !
