Cosmic Code: Book VI Of The Earth Chronicles

Synopsis

Many thousands of years ago, a group of extraterrestrials from another planet guided the evolution of life on Earth—determining the existence and nature of humankind as we know it today. How did the master builders from the stars construct the miracle called man? Is the DNA that is at the core of all life in the universe a "cosmic code" that links Earth to heaven and man to God? In this sixth volume of The Earth Chronicles, Zecharia Sitchin unveils writings from the past to decipher prophecies, and reveals how the DNA-matched Hebrew alphabet and the numerical values of its letters serve as a code that bares the secrets of mortal man—his fate and mankind's celestial destiny.

One of the charms of Zecharia Sitchin is his tendency to take ancient writings as fact as opposed to myth. For example, according to clay tablets discovered by archeologists, Gilgamesh, a king of ancient Sumeria, was punished by the gods for raping female subjects on their wedding day--a particularly naughty, though not uncommon, pastime of ancient royalty. Snickering, the tricky gods created a double of him, which, as you can imagine, created havoc in the king's life. Some time later, directed by his goddess mother, Gilgamesh walked with his double to Lebanon to attain immortality. Sitchin ponders that perhaps the double had superhuman strength and en route built a second Stonehenge discovered in the Golan Heights by Israelis during the 1967 Six Days War.

Hmmm. As Sitchin concedes, there's really no way to tell who actually built this hoary structure, but the in-depth archeological and historical research gathered here to support his musings concerning an extraterrestrial secret code to construct humankind is fascinating beyond belief. --P. “Readers interested in the Kabbalah and in numbers mysticism will find Sitchin provocative.” (UFO Magazine) “In terms of scholarship and research, his books are light years away from those other popular authors.” (New York Tribune)

I love all of Sitchin's books. This was one of two needed to complete the 'Earth Chronicles' series. I'm a big fan of the 'Ancient Aliens' tv series and the whole ancient astronaut theory so this was a must. All of these are informative and he really did his homework. Like Erich Von Daniken, Zecharia Sitchin shared the same ideas, but from a slightly different perspective. Each one is basically a different culture or civilization like Sumeria or Egypt and their 'gods'. These are facts and science-not fiction.

read most of Sitchin books the first half of this one was interesting second part not so, mostly thing I read in his other books not a must

Must read the Complete Series in order to understand the concept that covers 460,000 + years to present and at first you will think he is crazy but at some time you will question your belief system then by the conclusion you will know where you stand in your belief system and only Question is WHY? he does not answer that he leaves it to you and your belief system!!!

Very interesting book love it. I love these books keeps me busy on weekends and at night..I would recommend this book to everybody who likes these type of books..

Every book in the Earth Chronicles series is a delight to read. You may not agree with all of Sitchin's theories regarding Nibiru and the Anunnaki, but his chronology of ancient history and global events is spot-on, and his understanding of Sumerian mythology and language is impeccable. Regardless of the personal conclusions you arrive at after reading his work, I can certainly guarantee that you will also come away with a much greater sense of possibility for our ancient past, and the realization that there is much, much more to our history than we've ever been led to believe. In my opinion, it is

the great work of researchers like Zecharia Sitchin and others that will ultimately bridge the gap between evolution and creationism, and finally reveal to us the long-hidden truths about our celestial origins.

A very interesting book by Author Zecharia Sitchin. It is very ancient history and it maybe be difficult reading by some readers, and one has to really concentrate on the information that is given in the book. It is ancient History and goes back a Long ways, but it is interesting tho. This author has done a lot of researching for the information that is in this book. If one is interested in reading history , it is an excellent book. Harold E. Smith.

A must read.

I read all seven of Zecharia Sitchin's Book and found them all very interesting until the Sitchin began to restate the same material over and over again --after a while it was like rereading a book you had already read. If what he holds out as fact in his books is true, the books are very logical and well written. The problem remains he tried to get to many books out of the subject matter he had.
