Interpreting Land Records

Synopsis

Base retracement on solid research and historically accurate interpretation Interpreting Land Records is the industry's most complete guide to researching and understanding the historical records germane to land surveying. Coverage includes boundary retracement and the primary considerations during new boundary establishment, as well as an introduction to historical records and guidance on effective research and interpretation. This new edition includes a new chapter titled "Researching Land Records" and advice on overcoming common research problems and insight into alternative resources when official records are unavailable. Topical case studies provide helpful, plain-language descriptions of methods, problems, and resolutions, and appendices provide definitions, context, and modern interpretation of historical words and phrases. The text features exhaustive coverage and notes, with hundreds of case law citations annotated with expert insight that gives readers the complete background of the methods and techniques discussed. Boundary retracement entails the recovery of historical documents related to the original boundary, correct interpretation and analysis, and the accurate application of historic survey principles with correlation to conditions on the ground. This builds a legally-sound defense to the location of the boundary, and is crucial element to any project or transaction concerning land. Interpreting Land Records is the pre-eminent reference to help readers: Interpret historical land records, understanding their creation and documentation Become familiar with the various methods of historic surveys Overcome common research issues, including lost or corrupted records Establish boundaries free of vagueness or abstraction, with clear documentation Haphazard retracement leaves a boundary open to dispute and complicates future retracement efforts. Accuracy depends in part on quality research and the accurate interpretation of available documents. Interpreting Land Records provides comprehensive, practical guidance toward retracement based on sound evidence and technique.

Book Information

Hardcover: 432 pages

Publisher: Wiley; 2 edition (November 24, 2014)

Language: English

ISBN-10: 1118746872

ISBN-13: 978-1118746875

Product Dimensions: 6.5 x 1.1 x 9.6 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Customer Reviews

ACCURATE RETRACEMENT BEGINS WITH SOLID RESEARCH AND KNOWLEDGEABLE INTERPRETATION Haphazard retracement leaves a boundary open to dispute and complicates future retracement efforts; accuracy depends in part on quality research and the correct interpretation of available documents. *Interpreting Land Records* is the industry's most complete guide to locating, understanding, and applying historical land records, with topical case studies, plain-language explanations, and hundreds of case law citations that help readers build a defense for their findings to present in court. This updated second edition includes guidance on overcoming research problems, including insight into alternative resources when official records are unavailable. Coverage includes boundary retracement and the primary considerations during new boundary establishment, and clear direction on effective research that helps the reader to: Understand the creation and documentation of historical land records Overcome common research issues, including lost or corrupted records Become familiar with the various regional historical survey methods Weigh the relative importance of multiple conflicting elements Establish firm boundaries free of abstraction, with clear documentation Exhaustive coverage and practical, expert guidance make this book a valuable resource for surveyors, judges, students, attorneys, or anyone dealing with land questions.

DONALD A. WILSON, President of Land and Boundary Consultants, Inc., is both a licensed land surveyor and professional forester. With over fifty years in the profession, he is active in many surveying, mapping, and forestry organizations, and has served as the president of both the Maine Society of Land Surveyors and the New Hampshire Land Surveyors Association. Donald has authored over two hundred technical publications and more than fifty books.
