PreS-Gr 1—A boy tries desperately to get his three robots to sleep. He leads them into the bathroom for rotor brushing and shield cleaning and finally settles them and himself into bed. But just as the snappy rhyming text suggests the robots are fast asleep, a page turn repeatedly indicates otherwise. "BEEP! BEEP!" bleep the robots as they report "sensor aches," the need for a light and more oil and a coil, and problems with a loose belt or tight bolt. Finally, in utter frustration, the boy issues an ultimatum: "No more blipping!/Blinking-boinking!/Winking-whirring!/Squinking-oinking!" Of course, they ignore him with a last request: "a bedtime story." Then no more sounds ensue, for the robots have "finally put/their boy to sleep." The illustrations, created with pencil, watercolor, and digital paint, greatly extend the text. The chaotic bathroom spread shows a robot entangled in toilet tissue as another overflows the sink with bubbles and toothpaste and a third sprays water well beyond the bathtub. The boy first

rests with a wary eye on the troublemakers, yawns in hopeful anticipation of quiet, and finally lies spread-eagled in exhaustion. Alert readers will notice that a mouse, which has its own bed in the room, joins in the antics from start to finish. VERDICT A delightful tale of bedtime role-reversal that sharp youngsters will appreciate. —Marianne Saccardi, Children's Literature Consultant, Greenwich, CT

Todd Tarpley is the author of *Ten Tiny Toes* and *My Grandma is a Ninja*. John Rocco is the illustrator of picture books including *Blackout* and *Blizzard*, as well as the *Percy Jackson* and the *Olympians* series.

Not since *Knuffle Bunny* has a book engaged the attention of our two and a half year old granddaughter so thoroughly. This book met her right where she is at developmentally. She understands the bedtime routine but struggles as all toddlers do. We had such fun following the antics of the robots as the boy tries to put them to sleep for the umpteenth time! She enjoyed the little mouse and I laughed right out loud when she imitated the character washing under his arm. Again as other reviewers said, although the little ones can't read yet when they see the bold words BEEP,BEEP, they yell them out with gusto.Great book!

This book is just beautifully illustrated! The pictures go completely across the pages. Buy the hard copy - it's worth keeping. The little rhyming story is cute, and my 5 year old son and I love reading it at bedtime.

Sweet book. One of my three year old favorites! He loved it so much I purchased this one for a boy baby shower gift. Also, this is one of the few books my husband actually enjoys reading to our son at night.

This is the perfect bedtime story. Its short, sweet sentences and brightly colored imagery work perfectly to satisfy the most demanding of customers! Both my boys love this book and have pretty much memorized this by heart. They have even come up with their own little parody of the book. The mouse is a great touch! We originally stumbled across this at the library, and when my youngest fell in love with it we knew we had to own a copy. Kudos to the authors because they really understand little robots! I hope there's a sequel of some kind...maybe a breakfast story or a camping story! A highly recommended read.

This book is imply adorable! John Rocco does it again! Beep! Beep! tells the comical story of a young boy trying to get a good night's rest while dealing with rambunctious robots at the same time. The use of primary and warm colors is both aesthetically pleasing and perfect for the development of young readers. I would highly recommend this sweet story.

This book is a massive favorite with my little kiddos. Like, a read-it-three-times-every-night kind of favorite. It has amazing illustrations and an adorable story, so thankfully it's fun for grown ups to read as well. AND it's pretty short, which is helpful if you're faced with a never ending night time story routine. I'd suggest this book as a great gift for robot lovers ages 4 and under.

Enjoyable book for children!

I bought this book for my nephew as a first Christmas gift to share my love of robots with him. It's illustrations are absolutely adorable, and the attention to detail is wonderful. There are so many little features inside each page that you see something new every time you read it. Highly recommended!
