# The Big Breakfast Diet: Eat Big Before 9 A.M. And Lose Big For Life

## Synopsis

Eat a huge breakfast, lose a lot of weight? It sounds counter-intuitive, but when a clinical professor of endocrinology and metabolic disease advocates it, maybe it's worth considering. And when that same clinical professor offers proof that overweight women lost nearly five times more weight on a breakfast cure diet than their counterparts did on a low-carb diet, it's time to pay attention. Dr. Daniela Jakubowicz, a clinical professor at Virginia Commonwealth University and the Hospital de Clinicas Caracas in Venezuela, originally published her diet book in Venezuela and it became a South American bestseller, selling 300,000 copies. Now after continued research, Dr. Jakubowicz presents *The Big Breakfast Diet*, with its promise that you can have all the foods you crave, from pasta to bacon to ice cream, with just one catch—*you have to eat them before 9:00 A.M.* Based on the body's natural rhythms, eating a big, complete breakfast revs up your metabolism; helps burn more calories during the day and more fat at night; satisfies hunger all day long; boosts your energy; eliminates cravings for sweets; and reduces the risk of serious health conditions like type 2 diabetes and heart disease. After explaining the science behind the diet, and how the body's hormones and metabolism process food differently depending on what time of day you eat, *The Big Breakfast Diet* centers around a full 28-day meal plan—*breakfast, lunch, dinner, and snacks, plus recipes.* The day begins with a big breakfast—*a smoothie or shake, pancakes with berry syrup and ricotta cheese, Canadian bacon, a breakfast sweet*—*and ends with a moderate, delicious dinner.*

## Book Information

Paperback: 246 pages

Publisher: Workman Publishing Company (December 15, 2009)

## Customer Reviews

Eat a big breakfast, lose a lot of weight: It sounds counterintuitive, but it's true. Based on groundbreaking research into how the body's hormones and metabolism process foods differently depending on when you eat, The Big Breakfast Diet offers a 28-day-program plus recipes that lets you eat the foods you love (a doughnut or ice cream included) with the promise that you will lose significant weight and keep it off. The science proves it: A diet based around a big, protein-rich breakfast sheds pounds; revs up metabolism; helps burn more calories by day and fat by night; banishes carb cravings; provides energy to burn; and satisfies hunger all day. Learn to give your body the food it needs, when it needs it, and the rest is a piece of cake. Or pizza. As actress Eva Mendes says, "I never leave my house without a big breakfast, and I've never had a weight problem; after reading this book, I know why."

Daniela Jakubowicz, M.D., is a specialist in endocrinology and metabolic disease. Her studies have been published in The New England Journal of Medicine and The Journal of Clinical Endocrinology & Metabolism. She is originally from Venezuela, where an earlier version of her book, *¡Ni Una Dieta Mas! (Not Another Diet!)*, became a South American phenomenon.

Luckily I like eating breakfast and I usually get up early on work days, this means I can fit in the recommended food for breakfast easily. Once my body got used to the meals it was great, definitely don't get hungry during the day. The book has a lot of interesting information along with the eating programme, so makes for good reading. I do need to be organised so food is ready 'to go' for meals, so I am eating the correct types and quantity of food. (I'm generally rather lazy in the kitchen and grab, what ever is quick and easy) When I stick to the formula, I average a loss of 100 - 150 grams a day, which I am quite happy with. Adding regular exercise, would increase my loss, haven't managed to motivate myself on an exercise programme yet.

it works - get lots of protein for breakfast, not hungry for snacks in the afternoon!

Best eating plan I have ever tried! Midday snack and sugar cravings gone...never thought in a million years I would be happy eating vegetables, or have to force myself to eat chocolate at breakfast!

It had good concepts but it made me eat way more than I normally do. I have a thyroid issue so I

couldn't do it. I don't think the book is bad, I just think my body was not able to do this diet.

I first heard the author on a radio show and then sought out the book. I have been following her diet plan for 3 weeks now and feel so much better and am losing weight steadily. I truly do not get hungry later on and I do not crave sweets at all.

I stuck to this for awhile and it worked. Do think that the morning protein smoothies are a real plus.

I've lost 17 pounds and they are staying off! :D I'm no longer considered "chunky". I only wish it had more recipes!

this book truly understands that people who overeat are addicted to food and addresses this issue and how to control it.
