Samantha's Fun FM And Hearing Aid Book! Book!: Samantha's Fun FM And Hearing Aid Book

Synopsis

Please don't ever tell Samantha Brownlie that she is too young, too small or too hearing impaired to do something. Chances are the tenacious seven year-old will happily prove you wrong. Samantha's handwritten and hand illustrated story book entitled "Samantha and Her Fun FM and Hearing Aid Book!" tell the story of her life with hearing aids, and her use of an FM unit in her classroom at school. Her teacher talks into a microphone which transmits the sound of her voice directly to a receiver on Samantha's hearing aid. Sam also offers solutions to trouble-shooting problems that might occur with the FM unit which are very detailed and clear. Samantha originally wrote her story to help classmates and other children understand hearing loss and hearing amplification but her desire to educate more people about hearing loss prompted her -- with the help of her mom and dad -- to publish her book. Samantha hopes her book will help others who wear hearing devices and FM systems feel confident and comfortable with them. And that of course, is all part of Sam's master plan. Stay tuned for the future adventures and accomplishments of a little girl whose hearing care provider describes as "smart, funny, beautiful, and popular with her peers."

Customer Reviews

Please don't ever tell Samantha Brownlie that she is too young, too small or too hearing impaired to do something. Chances are the tenacious seven year old will happily prove you wrong. Her friends and family already know that nothing can hold her back when she sets her mind to accomplish something. That is how her handwritten storybook came to be. Sam originally wrote her story to help classmates and other children understand hearing loss and hearing amplification but her desire to educate more people about hearing loss prompted her -- with the help of her mom and dad -- to

publish her book. Samantha wants other children and adults with hearing impairments to feel more confident and comfortable with their hearing aids and FM units. Sam's master plan is to capture the hearts and attention of people around the world. Stay tuned for the future adventures and accomplishments of a little girl whose hearing care educator describes as "smart, funny, beautiful, and popular with her peers." And her proud mom adds, "She just sparkles."

As a special education teacher I was looking for something to share with a 5th grade student... this book is more elementary (written when the author was 7 years old) and is more appropriate for a younger audience, and emerging readers. The whole "book" is less than 30 sentences long? Not worth the money in my opinion. Sweet, but short, and overpriced. (At least for what I was expecting.) No offence Samantha. ;-)

My daughter wears hearing aids and always said "mom I wish there was a book I could show people when they ask me about my hearing aids" then I found this. She loves that it is written by a girl her age, so she can relate. I am so thankful for this book!

This book is a cute idea for younger children who have to wear a hearing aid and FM unit. I ordered one for a 5th grade girl in my school who is getting a hearing aid. The book came and took longer than I thought it would and it was misprinted on the inside. Completely unreadable!

Very well done.

Great book inspirational ! X

I bought the book for my niece, and an extra copy for the local library. The book looks as it should be appealing to children, easy size to handle, and printing very clear.

I bought the book for my five year old grandson who wears a hearing aid in each ear. The book was more about the FM in school, than about his hearing aids; or other kids reaction to his hearing aids. It not what I was looking for.

My two girls with hearing aids love it
