Jane Roberts studied History and the History of Art for a B.A. [Hons] degree at London University and took a Master's degree at the Courtauld Institute in Italian Renaissance Art, concentrating on the Venetian Renaissance. Thereafter she worked in London for a year during which time she wrote the catalogue for Colnaghi's exhibition of French Drawings - Post-Neoclassical. In January 1975 she became Curator of the Print Room at the Royal Library, Windsor Castle, where she produced the catalogue of the exhibition Leonardo da Vinci: Anatomical Drawings, shown at the Royal Academy 1977-78, and has been co-author of the catalogue Holbein and the Court of King Henry VIII for the exhibition at the Queen's Gallery, 1978-79.

I love reading channeled material. I love the concept. Whether it's just the author's imagination, or an actual entity speaking through a medium, I'm fascinated by the concepts. I read many different channeled authors at one period in my life. They're fun, good for some personal growth ideas. And then there's Seth. Seth's concepts are not cutesy fables, presented by a channel for light reading. Seth

is like the Noam Chomsky of channels. His writing is of such a magnitude and quality of depth, that he leaves other channels far behind. I enjoy having my mind blown by powerful concepts. Even taking them as purely theoretical. I found just checking his world view out enriched my experience of my own life profoundly. You don't need to think of any of it as "the TRUTH" or "THIS is the WAY". There's a million points of view out there. I just found Seth's point of view absolutely fascinating, well expressed, and worth the time to read. If you're someone who loves ideas for the sake of ideas, and want a very empowering way to view the world, read Seth. At all times his words seek to place one in touch with ones own power. He speaks to encourage individuals to take full responsibility for their own beliefs and to take responsibility for ones own life. His books aren't "new age fluff". They are not "oh just think positive." These are very real, very genuine essays on how to truly face ones own life. He is very aware of how nuanced our minds are at hiding from ourselves. He's like the best wise man of the village. These pages are full of loving empowering wisdom, a humorous poking at our egoism and limited beliefs.

For Seth fans, this is a good book to add more insight into the dream realms. Some of the concepts, such as parallel timelines, is very interesting and helpful, and there are good practical suggestions on how to remember and interpret certain dreams. It is one of Jane's older books, however, and doesn't have the same powerful clarity as some of the other books. Much of it relates to their personal life (Jane and Rob) and their own explorations. Since these occurred in the 1960s and 1970s, our collective consciousness has grown considerably to the point that much of this information seems a little antiquated. Still, I do believe in the validity and value of the Seth material, overall, and this book will help any who are on an awakening path, whether or not you are aware of the other Seth books. Better suited for those wanting to add to their understanding of the entity Seth and the life of Jane Roberts, a woman who contributed greatly to society through her efforts, sacrifices, and willingness to connect to those subtle realms.

There were two great and controversial American innovators in the field of the spiritual in the seventies: Jane Roberts and Carlos Castaneda. Both are great writers, but their mentality is totally different from each other. Castaneda has suffered from a backlash for over twenty years now, but in my opinion Jane Roberts has only gained throughout the years. This is a posthumous book about the beginning of her experience as a reluctant psychic, and a good one. I'd say it is for anyone who likes to delve into matters deep and mysterious. The tone is personal and the scope is wide. If you feel that channelled information is a load of bs, check this out first. I did, and even if I don't buy

everything that is said, i have to say I love Robert's style and her mind.

I am always going to be a fan of the Seth books. This book was published years after Jane was gone, but it was written during the beginning stages of Seth-Jane relationship. This book is different from the others, simply because Jane narrates it as her own experience, instead of the usual session format of the Seth books. I loved hearing Jane's voice as she described her exciting journey into the dream world and talked about her astral-projection experiences. The whole subject is fascinating to read; if you believe Jane really delved into the dream world, or not. Whatever your beliefs are, this book is both highly entertaining to the mundane as well as the scientific mind, for it leaves no doubt that Jane/Seth were highly intelligent and approached both metaphysical and scientific subjects with an objective--sometimes even empirical--mind. Yet, I have come to believe by reading this last book (at least for me--I have read them out of order) that a true scientist must sometimes open his mind to the world of the unexplained, and remember that magic is simply science we have yet to understand.

I first read Jane Roberts back around 1980 and recently was drawn back to re-read them in the fall of 2013 due to a positive reference in the last of Dolores Cannon's 4 books on The Convolute Universe. I was amazed and delighted to find quite a few that had been published posthumously. At first I focused on just the books that Seth had dictated and thought this might be one because of the title so ordered it. And so glad I did because then I had to go back and read Jane's books. This one has a lot of great information about dreams. And projections of consciousness. And I realized that not all of the notebooks of Seth material have been published. This one is well worth reading.

Even though I've purchased this book, I believe it is most helpful to read the first in the Seth Series, titled "The Seth Material." Don't consider reading any of The Seth Books unless you're ready to make changes for living a more conscious and joy-filled life. Undoubtedly, the Seth books will guide you in the process. I haven't completed reading this recently-purchased book, but it is on my dance card. I highly recommend reading any or all of the Seth books. Pat Holland Conner
